

FiESTA

Fire Equipment Tracking

Know the status of your fire equipment assets when you need to!

FiESTA allows you to track all forms of fire and safety equipment utilizing the technology of BAR CODES and handheld computers.

An association is made between a BAR CODE label secured to a piece of equipment, and to its designated location. A schedule of preventative maintenance and routine inspections are also assigned to the equipment. When an inspection is conducted, you are alerted if equipment has been displaced. **FiESTA** ensures the integrity of your fire safety procedures and inspections.

Features

Equipment File

Each piece of equipment has a uniquely numbered BAR CODE label attached to it. You would enter the serial number, make and description.

Location File

Together with the equipment's BAR CODE number, you enter other descriptive information about each location, such as floor, building and perhaps room number.

Inspection

First you scan in the location BAR CODE, followed by the equipment's BAR CODE. If the association is correct, you continue to your next location; if it is not, a fire truck-like alarm will sound.

View

Under the View mode, you can modify maintenance/inspection due dates.

Reports

Three report types are available; Descriptive (a complete listing of all equipment, sorted by description or location), inspection Due (all equipment due for inspection) and Maintenance Due (all equipment due for maintenance). Reports can be viewed on the PC version of FiESTA.

sagedata

Benefits of FiESTA

- Reduces time required for a physical inventory
- Confirms what equipment and when the equipment was inspected
- Speeds up administration in identifying which extinguishers need inspection or maintenance
- Fast and easy access to information
- Reduces time required by inspectors for paperwork
- Ensures that no equipment is missed

FiESTA Suggested Configurations

For up to 1,000 Pieces of Equipment

- Psion Workabout with 2MB and BAR CODE and RS-232 Interfaces
- BAR CODE wand
- 256KB Flash Solid State Disk
- PC to Workabout null modem cable
- Wrist Strap
- Belt holster

For up to 3,000 Items

- Psion Workabout with 2MB and BAR CODE and RS-232 Interfaces
- BAR CODE Laser Scanner
- 1MB Flash Solid State Disk
- PC to Workabout null modem cable
- Wrist Strap
- Belt holster

FiESTA includes everything you need to get started; a Workabout, a scanner, the Windows-based PC program, 1,000 BAR CODE labels, user manual and communications cable.

SageData Solutions Inc. is a world leader in the development of **BAR CODE** technology for handheld computers and has developed numerous "off-the-shelf" **BAR CODE** tracking systems which may be of benefit to you and your company.

All our systems have a 30-day "no-hassle" money back guarantee.
